

This comment to the FCC is in regards to K-Love Radio Station. Many thousands of individuals around the United States of America listen to this radio station, which provides positive and encouraging music for the entire family 24 hours a day, seven days a week. K-Love promotes wholesome values and family-friendly programming that impacts communities all across America.

Please do not replace K-Love (which listeners hear on FM translators) with other Low Power FM stations.

Many radio stations are not family-friendly and are not appropriate for children, nor do many of them encourage their listeners in the ways K-Love does, therefore, this radio station needs to stay on the air by way of FM translators to provide a healthy, encouraging radio station for families all over the United States that are working to teach their children values so that our society can be healthy and to create a positive environment for the generations to come.

Thank you for reading these comments and please consider keeping K-Love radio on FM translators and NOT replacing it with LPFM stations.
